

Product of the month

[MEYLE-ORIGINAL wheel bearings, MEYLE no.: 614 652 0010, short no.: MWH0188]

Going low-wear? For sure!

MEYLE-ORIGINAL wheel bearings to fit Opel Astra & Zafira models

As DRIVER'S BEST FRIEND we offer 23,000 solutions to make vehicles around the globe perform longer and more reliably so that motorists all over the world can safely rely on MEYLE quality.

- **Low-wear** – The bearing shells and balls are made from highest-grade rolling-bearing steel, offering increased wear resistance over conventional steel and superior fracture toughness.
- **Tightly sealed** – Each application is fitted with a seal ideally matched to the respective application – which means, we do not always apply exactly the same sealing technology, like some of our competitors do.
- **Extra hardened** – The hub flange is of immense importance in terms of safety. In contrast to some competitor products, each hub flange on the MEYLE-ORIGINAL wheel bearing units is especially hardened during production.
- **Water-repellent and smooth-running** – MEYLE-ORIGINAL wheel bearings run on high performance greases specially developed to offer water-repellent properties and ensure smooth concentricity – even in extreme conditions.
