

A perfect combination: MEYLE-ORIGINAL individual components for the timing drive!

MEYLE is adding some 100 MEYLE ORIGINAL tensioning rollers and arms, idler pulleys and vibration dampers to its range of timing drive components.

Always the right solution on hand: Adding more than 100 separately available MEYLE-ORIGINAL timing drive components, MEYLE now offers tailor-made solutions to complement its range of MEYLE-ORIGINAL timing belt kits and MEYLE water pump kits. Thanks to these additions, workshops will have all the individual parts required for timing drive repair immediately on hand allowing them to meet their customers' individual repair needs swiftly and flexibly.

The range of individual timing drive components includes tensioning rollers and arms, idler pulleys and vibration dampers, all of which come in genuine MEYLE-ORIGINAL quality.

Collaborating with high-profile OE/OES suppliers as partners in production, MEYLE ensures that MEYLE-ORIGINAL timing drive components fully comply with the relevant OE specifications.

Key product features at a glance:

- High-grade materials for maximum part life
- Low-noise operation
- Designed to exacting specifications for seamless integration in the timing drive system

To fit a wide range of vehicle applications, including Audi, Seat, Skoda, VW and Volvo models along with various French and Asian brands.
